COMPANY PROFILE

Company Overview

As a Global Construction Corporation, our company is shaping the future of the construction industry by combining human source, concern for the environment and state of the art technology. Namhung was founded in 1969 and has a well established reputation for trustworthiness, accuracy and integrity. We are continuously setting new standards in such diverse business fields such as architecture, civil engineering, cold storage warehousing and fire protection.

Since 2006, Namhung has diversified field of expertise by setting foot into global construction projects funded from Economic Development Cooperation Fund (EDCF) by Export-Import Bank of Korea and other private constructions projects. Furthermore, Namhung established Office in Seoul to build up more opportunity on overseas construction projects.

Based on a great store of construction experience and human resources where 80% of the employees are registered engineers in Korea, Namhung will continue to be a major leader in finding creative and innovative solutions to meet the world's immerging new opportunities. Namhung has been always keeping a rigid rule of minimum management expense and construction cost to meet customer's satisfaction.

MESSAGE FROM CEO & COMPANY ORGANIZATION STRUCTURE

Message from CEO

Established in 1969, Namhung Construction Company led Cold Storage Construction Market of Korea by occupying more than fifty percent of the Cold Storage construction work across the country. Based on this success, we continuously expanded widely in various Construction fields in Medical, Residential, Commercial, Educational and Civil Engineering. The accumulated experience and enriched human resources lead Namhung to step into the globalization of Construction Market. Since 2006, we have diversified field of business globally by participating in various overseas project from private sector to Economic Development Cooperation Funds of Export-Import Bank of Korea.

The Construction capability evaluation report of year 2021 announced by Construction Association of Korea (CAK) evaluated 65 Millions USD due to the impact of COVID-19 pandemic. However, we have already reached up to 70 Million USD in Construction Performance for the second quarter of 2022 and we are dedicated to accomplish 150 Million USD by the end of year 2022.

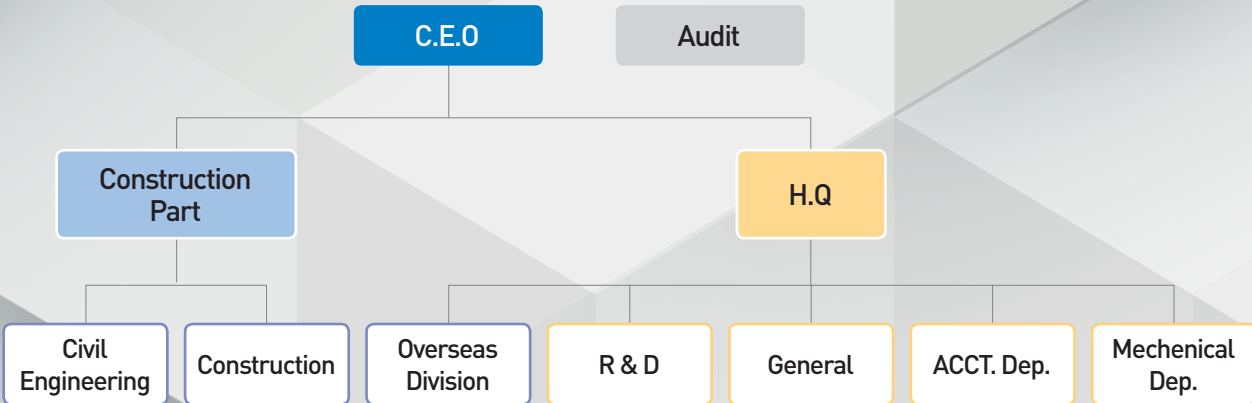

As our clients entrust us to deliver projects that will build their future. We are committed to provide supreme quality of service to our valuable clients based on our business philosophy **“TRUSTWORTHINESS, ACCURACY AND INTEGRITY”**
